

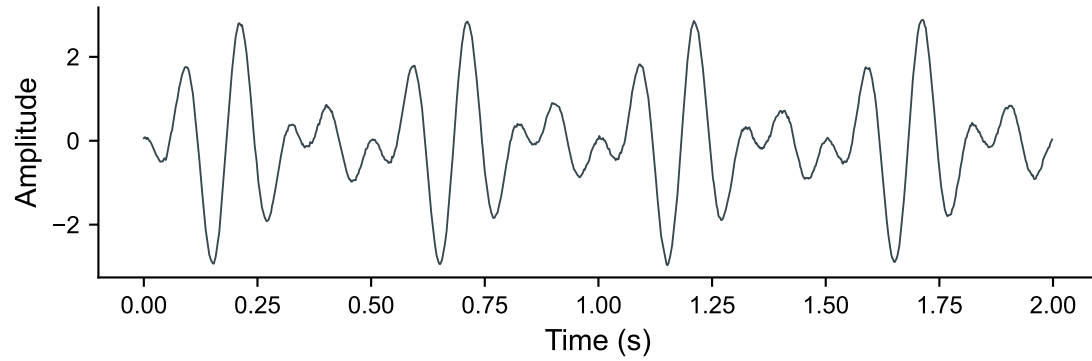

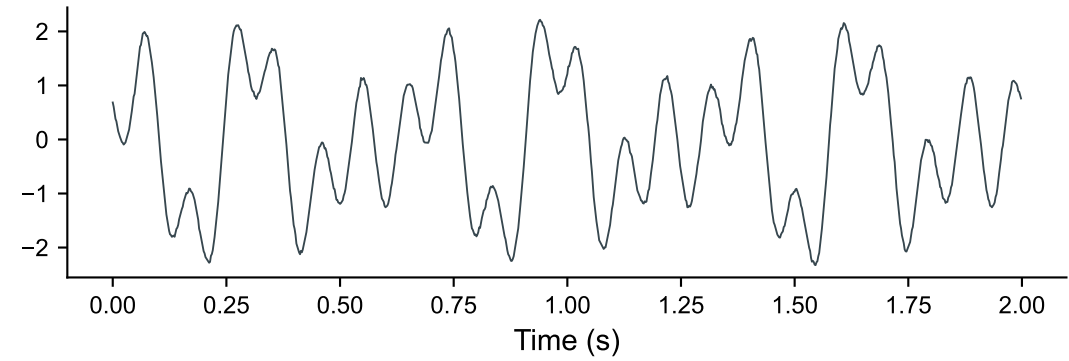

Figure 15 — Polyrhythmic stimuli (3:4:5, 2:3:7): all carriers resolved; kernel choice shapes relative peak height

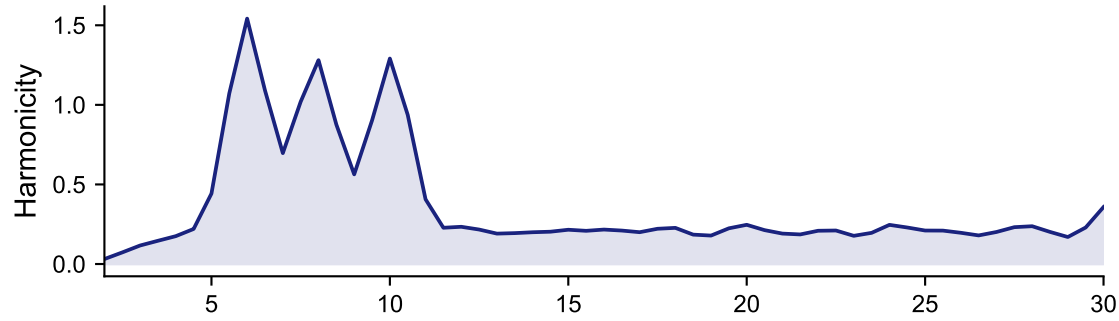

a) 3:4:5 polyrhythm (carriers at 6, 8, 10 Hz)

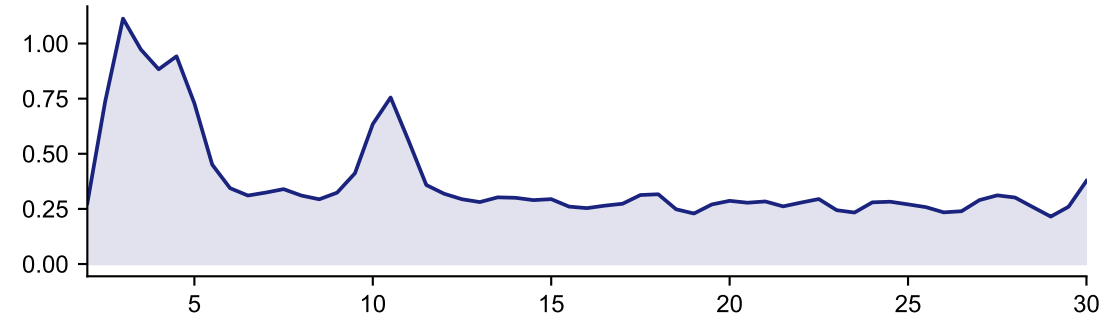

b) 2:3:7 polyrhythm (carriers at 3, 4.5, 10.5 Hz)

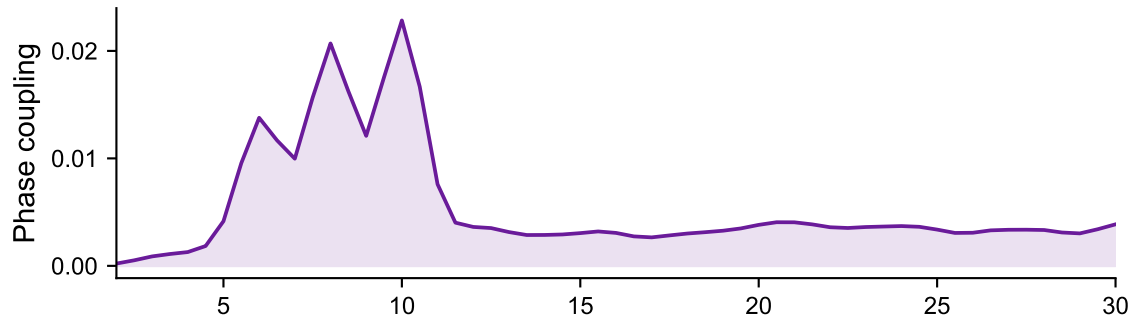

c) $H(f)$ — 3:4:5 (harmsim kernel)

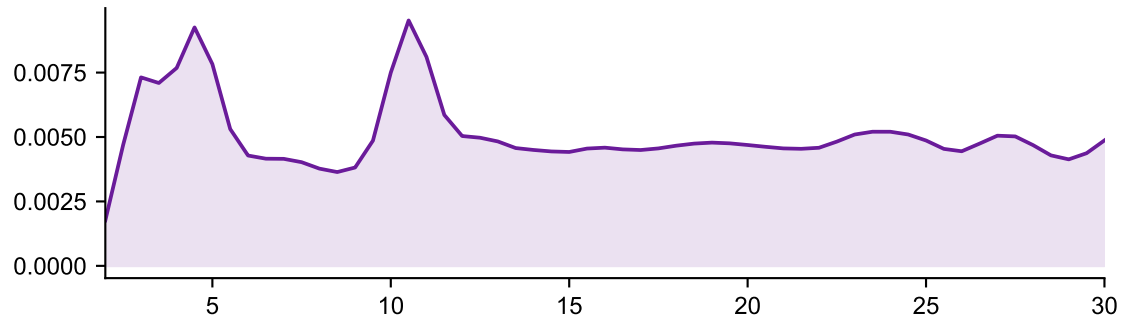

d) $H(f)$ — 2:3:7 (harmsim kernel)

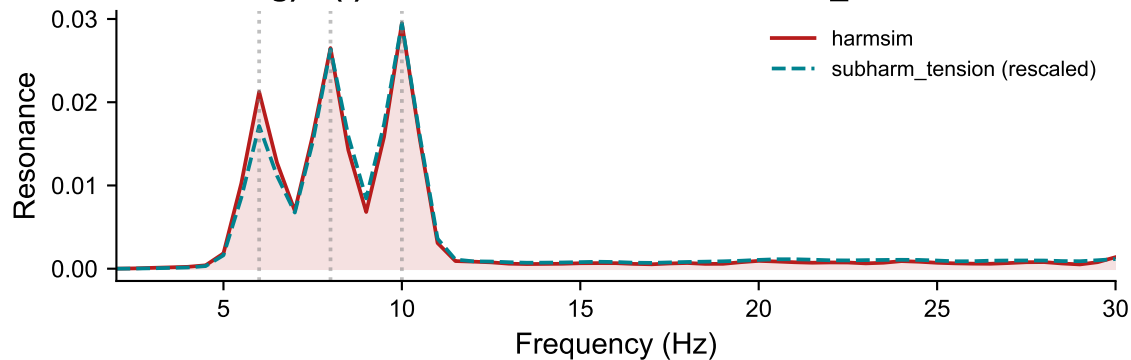

e) $PC(f)$ — 3:4:5

f) $PC(f)$ — 2:3:7

g) $R(f)$ — 3:4:5: harmsim vs subharm_tension

h) $R(f)$ — 2:3:7
